Meet the Parts of Speech: The Complete Series Jul 14 2021 With a book for every part of speech, the complete Meet the Parts of Speech series includes story-based adventures combined with traditional instruction and usage examples for nouns, verbs, adjectives, adverbs, pronouns, conjunctions, prepositions, and interjections. In Grammaropolis, adverbs don't just modify verbs; adverbs are bossy. They tell the verbs where to go, when to leave, and how to get there. A pronoun doesn't just replace a noun; Roger the pronoun is a shady character who's always trying to trick Nelson the noun into giving up his spot. The Meet the Parts of Speech series uses the mechanics of character and story (plot, motivation, setting, etc.) to breathe life into what has traditionally been unengaging subject matter. Our story-based approach combines traditional instruction with original narrative content, which appeals to different learning styles, increases both engagement and retention, and encourages students to make a deeper connection with the parts of speech and punctuation marks. The complete series includes: Nelson the Noun Nelson takes a break from his stressful day job, leaving the Noun Office in the hands of Roger the pronoun. After discovering that vacation isn't what he'd hoped it would be, Nelson returns just in time to fix the confusion Roger has caused in his absence. Vinny the Action Verb & Lucy the Linking Verb Vinny and Lucy approach life differently. He's all action, while she's content to sit back and be. With their friend Jake the adjective in trouble, however, the two verbs must put aside their differences and work together to save the day. Jake the Adjective When Jake's nemesis pulls a prank and turns Grammaropolis into a grey, misshapen, tasteless town, Jake is forced to run around restoring everything--the colors, shapes, sizes, tastes, and more--to the way it was all meant to be. Benny the Adverb When his prized rock collection is stolen from the bank, Benny opens an investigation into how and when the theft took place and where the thief might have gone. Roger the Pronoun Feeling that he's destined for more than just renaming nouns, Roger opens up his own store next to Nelson's Nouns. But when Nelson goes missing, Roger realizes that for life to mean anything at all, every pronoun has to have an antecedent. Connie the Conjunction Nobody in all of Grammaropolis has more style than Connie; she simply knows how to put things together. After a bump on the head makes her give bad advice, she uses all the conjunctions at her disposal to set everything right again. Lil' Pete the Preposition When launching his model rocket in the park, Lil' Pete gets excited and forgets to add objects to his prepositional phrases. Without objects, the prepositions become adverbs, and chaos ensues as the rockets fly up, by, and around with no direction at all. Izzy the Interjection No matter whether the emotion is strong or mild, positive, negative, or somewhere in between, Izzy lives to express it. Loneliness can be a problem sometimes because she's not grammatically connected to the other words in the sentence, but when the time comes, she leaps at the chance to express her strongest emotion yet.

JavaScript: The Good Parts Apr 11 2021 Most programming languages contain good and bad parts, but JavaScript has more than its share of the bad, having been developed and released in a hurry before it could be refined. This authoritative book scrapes away these bad features to reveal a subset of JavaScript that's more reliable, readable, and maintainable than the language as a whole—a subset you can use to create truly extensible and efficient code. Considered the JavaScript expert by many people in the development community, author Douglas Crockford identifies the abundance of good ideas that make JavaScript an outstanding object-oriented programming language—ideas such as functions, loose typing, dynamic objects, and an expressive object literal notation. Unfortunately, these good ideas are mixed in with bad and downright awful ideas, like a programming model based on global variables. When Java applets failed, JavaScript became the language of the Web by default, making its popularity almost completely independent of its qualities as a programming language. In JavaScript: The Good Parts, Crockford finally digs through the steaming pile of good intentions and blunders to give you a detailed look at all the genuinely elegant parts of JavaScript, including: Syntax Objects Functions Inheritance Arrays Regular expressions Methods Style Beautiful features The real beauty? As you move ahead with the subset of JavaScript that this book presents, you'll also sidestep the need to unlearn all the bad parts. Of course, if you want to find out more about the bad parts and how to use them badly, simply consult any other JavaScript book. With JavaScript: The Good Parts, you'll discover a beautiful, elegant, lightweight and highly expressive language that lets you create effective code, whether you're managing object libraries or just trying to get Ajax to run fast. If you develop sites or applications for the Web, this book is an absolute must.

Free Will May 24 2022 This novel contributed volume advances the current debate on free will by bridging the divide between analytic and historically oriented approaches to the problem. With thirteen chapters by leading academics in the field, the volume is divided into three parts: free will and determinism, free will and indeterminism, and free will and moral responsibility. The contributors aim to initiate a philosophical discourse that profits from a combination of the two approaches. On the one hand, the analytic tools familiar from the debate – arguments, concepts, and distinctions – can be used to sharpen our understanding of classical philosophical positions. On the other hand, the rich philosophical tradition can be reconstructed so as to inspire new solutions. In recent years, the problem of free will has received special attention in the analytic arena. This is the first anthology to combine historical and analytic perspectives, significantly furthering the debate, and providing a crucial resource to academics and advanced students alike.

Free Bird Seed, 500 Yards May 12 2021 Charlie Parker meets the Roadrunner in this bebop chart for brass quintet. A typical "Bird-like" head is bantered about the ensemble while the tuba provides a smooth walking bass line. There are written solos for 2nd trumpet and tuba and there is enough bird seed (errrr...ensemble work) to keep everyone busy. Confirmation that Now's The Time to Scapple From The Apple and get playin' this sizzler. Plug this one in and watch it go. Drum part with written fills included. "Meep, meep".
