Ethical Basics for the Caring

Professions Oct 05 2020 This book trains students of the caring professions, across health and social care, in the basic philosophical skills and knowledge needed to deal with the ethical aspects of their profession. It shows why ethical education is required, and teaches the skills of reasoning that equip professionals to think critically about the theories and arguments used in ethical discussions. It demonstrates how we can be confident that we can rely on common moral ground; but it also points out how we need to recognise the influence of different world-views, and to note how, on some issues, these can lead us in starkly different directions. It explains relevant philosophical theories, and evaluates their strengths and weaknesses - particularly in relation to what is required for proper professional ethics. It shows how to employ the commonly accepted framework of four ethical principles - beneficence, non-maleficence, autonomy, and justice. These various matters are then illustrated in two extended case studies, which focus on the problem of euthanasia, and the question of screening for disability and the value of human life. Ethical Basics for the Caring Professions is designed for use on all health and social care and human services courses on ethics and values. It will also be of interest to academics and professionals working within these fields.

It is my unique, personal honor to bequeath shards of wisdom to an inspiring woman of God, fellow businesswoman, and professional confidant Jennifer Carrington. She has crafted a timely, succinct, and relevant treatise. This work is a culmination of successive years of fine-tuning, labor, contemplation, and learning moments. This masterpiece, though laconic, injects a cornucopia of powerful principles and emits laser focus on the art of business branding, content, and presentation. Frankly, this book should be a required reading in both the halls of academia and for small/medium enterprises alike. As a personal and business mentor of Jennifer, I

have witnessed firsthand how this driven and dogged businesswoman masterfully utilizes the concepts noted in this book in her own business] Carrington + Associates. She has proven to me on multiple occasions the value and pertinence of branding, content, and presentation. Her firm has, without slight hesitation, provided astute excellence and value-added service to our jurisdictional platform since I began working with her. As a competent, proven, and savvy businesswoman myself, I've trodden the deserted road of entrepreneurial persistence from my youth. During the last thirty-three years of trudging through provinces of resistance, peaks of success, and valleys of trepidation, I've learned the utter importance of crafting and molding the essential elements of branding. Without the organic and pliable foundation of branding, my quick-serve restaurant holdings company, V & J, would have flatlined with my initial Burger King acquisition. But by positioning and pivoting my firm as a brand unto itself, my company has been catapulted into a vast conglomeration of multiple food-service brands. As such and with the advent of global technology and social media, branding should be the lifeblood of any. Congratulations, Jennifer, and on serious entrepreneurial endeavors whether small or large. Read this book and find out why! May the Lord continue to shine his favor upon you as share your insights and unpretentious learnings
