Wordsmith Sep 03 2022 The Wordsmith series is the value-priced option that students will appreciate while mastering key writing and grammar skills. Pam Arlov wrote a textbook series that counters many of the objections students had about textbooks, such as: Students find textbooks dry and tedious. Arlov includes thought-provoking chapter openers, plenty of visuals, and a conversational, engaging writing style that students really respond to. Students find textbooks irrelevant to their lives. Arlov's coverage of the rhetorical modes is realistic and models real-life writing. She includes "Real Writing" examples in the modes chapters to make Wordsmith relevant to students' lives. Students become frustrated if the entire text is not used in class. Wordsmith is 100 pages briefer than similar texts on the market and an affordable option. This more concise approach also does not overwhelm students with too much information. Wordsmith provides students with just the right balance of instruction and practice.

**Living with Earth** Mar 29 2022 For many students with no science background, environmental geology may be one of the only science courses they ever take. *Living With Earth: An Introduction to Environmental Geology* is ideal for those students, fostering a better understanding of how they interact with Earth and how their actions can affect Earth's environmental health. The informal, reader-friendly presentation is organized around a few unifying perspectives: how the various Earth systems interact with one another; how Earth affects people (creating hazards but also providing essential resources); and how people affect Earth. Greater emphasis is placed on environment and sustainability than on geology, unlike

other texts on the subject. Essential scientific foundations are presented - but the ultimate goal is to connect students proactively to their role as stakeholders in Earth's future.
