The Social Psychology of Gay Men Feb 09 2021 This book focuses on the social

psychological aspects of gay men's lives and provides a cutting-edge examination of topics including sexual orientation, sexual behavior, identity, relationships, prejudice, and health. The *Social Psychology of Gay Men* forces us to re-think existing theory and research, much of which has taken heterosexuality for granted. With identity process theory at its heart, this book advocates a social psychology of gay men which incorporates three levels of analysis – the psychological, interpersonal and societal. The book promises not only a deeper understanding of gay men's lives but also pathways for enhancing wellbeing, intergroup relations and equality in this key population. This illuminating and thought-provoking text is an invaluable resource not only for psychologists, but for students, scholars and practitioners working in the area of gay men's life.

Sexual Orientation in Child and Adolescent Health Care Jun 01 2020 *Sexual Orientation in Child and Adolescent Health Care* serves as a resource for child health care professionals including pediatricians, family physicians, nurses, pediatric psychologists, child and adolescent psychiatrists, and social workers. The issues of sexuality and sexual orientation now generate great interest among those who treat children. This volume describes the effects of stigmatization on non-heterosexual physicians, patients, and students, and discusses a variety of clinically relevant topics including the development of sexual orientations, children of gay or lesbian parents, young children with gender atypical behavior, and the healthcare needs of gay and lesbian adolescents. The last two chapters

describe methods for improvement in medical education and medical care, and provide extensive resources available to professionals and consumers.

Sexual Orientation, Gender Identity, and Schooling Aug 03 2020 'Sexual Orientation, Gender Identity, and Schooling' brings together contributions from a diverse group of researchers, policy analysts, and education advocates from around the world to synthesize the practice and policy implications of research on sexual orientation, gender identity, and schooling.

Social Services between General Interest Orientation and Internal Market Dynamics

Nov 06 2020 The thesis analyses the EU-level policy process on "Social Services of General Interest" over more than a decade. The author identifies the factors that can explain the development and state of play of the EU-level legal, policy and quality frameworks at the end of 2016. He elaborates on relevant theories, concepts and political discourses and looks into the role and initiatives of the EU Member States and the European Commission as the key policymakers. The thesis analyses the reasons and implications for the organisation, provision and financing of social services that stem from the overarching or recalibration of national policy arenas and scopes by the internal market and the EU policy context.

The Psychology of Oppression Dec 19 2021 Written in an engaging and relatable manner, this book reviews the psychological theories and research on the topic of oppression – its

evolution, its various forms, and its consequences. Painful historical examples and modern-day occurrences of oppression including mass incarceration, LGBT and transgender issues, police brutality, immigration reform, anti-Muslim sentiments, and systemic racism are explored. How oppression exists and operates on various levels, the mental and behavioral health consequences of oppression, and promising clinical and community programs to eradicate oppression are reviewed. The authors hope that by providing readers with a basic understanding of oppression it will motivate them to combat bias to create a more just, harmonious, and healthy world. Highlights include: Introduces readers to the psychological theories and research on oppression whereas most other books focus on a sociological or ethnic studies perspective. Introduces readers to the fundamentals of oppression--what it is, who experiences it, and where and when it has taken place. Dissects the layers of oppression -- how it is expressed blatantly or subtly and overtly or covertly. Explores how oppression is manifested on different levels including interpersonal, institutional/systemic, and internalized, for a deeper understanding. Demonstrates how oppression influences peoples' thoughts, attitudes, feelings, and behaviors, and how it influences peoples' well-being and health. Explores why certain people are discriminated against simply because of their race, ethnicity, gender, or sexuality and the resulting psychological implications. Highlights what researchers and service providers are doing to address oppression via encouraging community and clinical interventions. Examines why oppression exists and has

persisted throughout history and what it looks like today. Recommends future psychological work on oppression across research, clinical, and community contexts. Ideal as a text in upper level undergraduate and beginning graduate courses on oppression, prejudice and discrimination, race relations, ethnic studies, ethnic and racial minorities, multicultural or cross-cultural psychology, multicultural counseling, diversity, women's studies, LGBT studies, disability studies, and social justice taught in psychology, social work, and counseling. Behavioral and mental health providers in both clinical and community contexts will also appreciate this book.

Social Comparison, Judgment, and Behavior Aug 23 2019 Comparison with other people, a core element of social life, influences self-concept, attitudes, conformity, psychological and physical well-being, achievement, educational outcomes, and social movements. Social comparison has become particularly salient as social and income inequalities have been increasingly recognized in the United States and elsewhere globally. This volume presents classic and state-of-the-science chapters by leading experts that survey the major areas of social comparison theory and research. Authored by noted experts, the volume is divided into three sections: Basic Comparison Processes, Neighboring Fields, and Applications. The first section is comprised of chapters that update classic theories and present contemporary advances, such as the dominating effect of local

versus global comparisons, an analysis of the psychology of competition, how comparisons across different domains influence self-concept and achievement, and the integral connections between stereotyping and comparison. The second section introduces perspectives from related fields, such as the decision and network sciences, that shed new light on social comparison. The third section focuses on practical applications of comparison, including relative deprivation, health psychology, the effects of income inequality on well-being, and the relationship of power to comparison. This volume is a must-read for anyone interested in the field of social comparison and its implications for everyday life.

The Psychology of Sexual Orientation, Behavior, and Identity Jul 02 2020 This comprehensive overview of research, issues, and theories relating to sexual orientation, behavior, and identity by experts in various disciplines is unique in providing both historical perspectives and a synthesis of the recent advances in understanding homosexuality and heterosexuality. Drawing from biological and psychological research, this major reference explores the major theories about orientation; summarizes recent developments in genetic and neuroanatomic research; considers the role of social institutions in shaping current beliefs; and discusses the social construction of gender, sexuality, and sexual identity. The handbook also describes sexual dysfunctions in non-clinical populations, clinical disorders, and important social issues. Experts address the continuing controversy over the feasibility

of altering sexual orientation; practical concerns such as disability and illness; new developments in treating sexual and personal problems within heterosexual and homosexual populations; and perspectives about sexual deviations today. This handbook is designed for the use of educators, students, and researchers in the social and behavioral sciences.

Health, Coping, and Well-being Oct 25 2019 Over the past decades, the field of health psychology has witnessed a tremendous growth, and social psychologists have contributed substantially to the theoretical foundation of this field. Their research has focused on a wide variety of health-relevant topics such as how individuals decide to respond to threats to their health and well-being, how and why they change their behavior to avoid such threats, and especially, how they adjust to or cope with the risk of threatening disease and with the diseases themselves. As diverse as this literature may be, however, there does appear to be a common theme throughout much of it--the observation that comparison of oneself and one's health status and coping efforts with others is an integral part of the coping process. Consequently, social comparison theory is increasingly becoming recognized as a fruitful framework for illuminating health related issues. A still expanding literature is exploring the role of social comparisons with respect to coping with a wide range of health problems, including cancer, physical decline among the aged, rheumatoid arthritis, AIDS, stress at work and occupational burnout, and eating disorders. Social comparison theory has augmented knowledge about the ways in which people cope with stressful events, and thus

has contributed significantly to it. At a more basic level, research in this applied context has made significant contributions to the development of social comparison theory itself. The present volume presents an overview of the various ways in which social comparison theory has been applied to issues related to health, coping, and well-being, and also points out how these applications have contributed to our insight into the way humans employ social comparison information. Given the attention paid to theoretical and applied issues, this volume will appeal to a wide audience, including social and health psychologists, as well as therapists, physicians, clinicians, medical sociologists, nurses, and those involved in the growing field of nursing research.

Case Studies on Sexual Orientation and Gender Expression in Social Work Practice

Jul 14 2021 This casebook focuses on sexual orientation and gender expression in relation to social work practice. An excellent resource, it offers 29 cases illustrating the variety of issues facing gay, lesbian, bisexual, and transgender (GLBT) people and communities in five practice settings—individuals, couples and families, communities and organizations, groups, and policy and research. The book also contains discussion questions, classroom exercises, and suggested readings for each case, so educators can easily integrate GLBT content into the classroom. Case Studies on Sexual Orientation and Gender Expression in Social Work Practice may be used on its own, in conjunction with another textbook, or as a complement to Deana F. Morrow and Lori Messinger's *Sexual Orientation and Gender*

Expression in Social Work Practice: Working with Gay, Lesbian, Bisexual, and Transgender People (Columbia, 2006). Messinger and Morrow are award-winning teachers and their groundbreaking book is key for culturally competent undergraduate or graduate courses in practice, policy, human behavior and the social environment, research, and field education.

Social Comparison and Social Psychology Oct 29 2022 Much of our knowledge about ourselves, and about the world in which we live, is based on a process of social comparison. Our tendency to appraise events, objects, people, and social groups by making comparisons has captured the interest of social psychologists for over half a century. This volume provides an up-to-date synthesis of the latest theoretical and empirical developments in social psychology through research on social comparison processes. With chapters by leading theorists and internationally renowned researchers, it provides invaluable information on the role of this process of comparison as it occurs within a single individual over time, between individuals, and between social groups. It also features an original international study testing the universality of the effects of social comparison on the self. This book will appeal to scholars and students alike and will serve as an important reference for the study of cognition, intergroup relations and culture.

A Balanced Epistemological Orientation for the Social Sciences Mar 22 2022 A Balanced

Epistemological Orientation for the Social Sciences challenges social researchers to rethink the epistemological assumptions grounding their work. It reviews the strengths and weaknesses of four salient epistemological orientations in the field – positivism, relativism, interpretivism, and intersubjectivism – to identify the characteristics of a theoretically-informed epistemology for social science. Relying on such an epistemology means seeking a deeper understanding of the social world without losing sight of the constructed nature of one's conceptual frames. It involves adopting a reflexive position with regard to the norms and traditions in one's area of specialization and in the field as a whole. Epistemologically-balanced social research is neither the dispassionate gathering of factual information, nor the elaboration of universal assessments formed on the basis of armchair speculation. It involves engaging in inquiry in an independent manner and being aware of the perspectival character of the claims being made in the attempt to shed new light on social phenomena. The caliber of social science can be elevated when researchers recognize the symbolic nature of their work and the significance of their conclusions in the larger social order.

An Investigation of how Students, Faculty, and Administrators Within a Particular Liberal Arts College Perceived a New-student Orientation Program's Effect on Students' Social Integration and Retention Feb 27 2020 Because of the difficulties new students may encounter upon starting college, an orientation program's ability to address students' needs could potentially persuade them in their decision to persist or leave. The

purpose of this study was to investigate how students, faculty, and administrators within a particular liberal arts college perceived a new-student orientation program's effect on students' social integration and retention. Findings indicated a majority of interviewed students had a positive experience during the orientation program. The environment provided, the orientation activities, and required participation in the orientation were the topics derived from respondents' comments linking students to social interaction. The orientation program provided this environment by facilitating interaction among new students, establishing a surrogate family for new students, and fostering long-term friendships among students.

An Experiment in Social Work Jul 22 2019

Love Is an Orientation Jun 20 2019 When three of Andrew Marin's friends came out to him in the span of three months, he was confronted head-on with the question of how to reconcile his friends with his faith. Love Is an Orientation is the result of years of wrestling with this issue. In the book, Marin speaks out with compassion and conviction, elevating the conversation between Christianity and the GLBT community so that the focus is moved from genetics to gospel, where it really belongs.

Sexual Orientation and Gender Expression in Social Work Practice Apr 23 2022 This

volume offers an invaluable resource for both social work educators and practitioners working with gay, lesbian, bisexual, and transgender (GLBT) clients and their families. It is the first such work to specifically address issues affecting bisexual and transgender people as well as the larger concerns of the GLBT community. Contributors present specific, practical suggestions for effective knowledge-based and skills-based practice with GLBT clients. Topics include heterosexism and homophobia, identity development, coming out, GLBT adolescents and older adults, health-care concerns, relationships and families, workplace issues, the history of the GLBT civil rights movement, sex reassignment, AIDS, and the role of spirituality in the lives of GLBT individuals. The contributors also consider intragroup issues of race, ethnicity, age, and socioeconomic status.

Lifeworld-Orientation in Social Work Jun 25 2022 Research Paper (undergraduate) from the year 2008 in the subject Social Work, grade: 1,1, University of Cooperative Education Villingen-Schwenningen, language: English, abstract: The terms "lifeworld" and "lifeworld orientation" are in constant use and seem to be omnipresent. The lifeworld seems to be taken for granted, as it is hardly ever discussed in detail or concretely distinguished from other terms such as "everyday life" or "social space". The concept of lifeworld orientation plays a major role in social education, especially in child and family welfare. At the latest since the Eighth Youth Report, the so-called lifeworld orientation has been considered a central paradigm of youth welfare. Above all, the educator Hans Thiersch, who was also

involved in the preparation of this report, coined the term "lifeworld orientation". The discussion of lifeworld-oriented social work was triggered by changes in society. Today, coping with everyday life requires many more preconditions, such as self- and social competence, assertiveness or self-confidence, than in earlier decades, when gender and generational roles, educational, health and nutritional concepts as well as career paths were still predetermined by stable traditions and social relations.

Conservative Christian Beliefs and Sexual Orientation in Social Work Jan 20 2022 This important new work addresses the tensions and divisions in social work between conservative Christian and lesbian, gay, and bisexual students, practitioners, faculty, and clients. Authors representing a diverse range of sexual orientation, religious, and professional identities explore the different facets of the debate regarding freedom of religious expression and full sexual orientation affirmation to provide a deeper understanding of the complexity of topics such as social identity, oppression, power and privilege, human rights and social justice, attitudes and prejudice, and ethics and the law. Models of Christian lgb affirmation and advocacy are presented, and recommendations for teaching, research, and practice are provided to move the field forward. -- Book Cover

Social Decentering Apr 11 2021 Social decentering theory was developed in response to the confusion created by the use of the term empathy and to a lesser extent, perspective-taking, to reflect a wide and varied set of human cognitive processes and behaviors. Theory

of Social Decentering: A Theory of Other-Orientation Encompassing Empathy and Perspective-Taking, presents an innovative approach to the social cognitive process by which humans take into consideration the thoughts, feelings, behaviors, and dispositions of other people. The multidimensional theory and measure of social decentering represents a unifying theory that identifies and incorporates key elements imbedded in other-oriented terms. The first chapters present the theory and development of a measure of social decentering in a complete and detailed manner examining the important role that social decentering plays in human communication. The remaining chapters of the book examine the role that social decentering, empathy, and perspective-taking play in the development and management of interpersonal relationships, in marital relationships, in teams and group interactions, and in the workplace. The final chapter examines the negative consequences to individuals, decisions, and relationships potentially created by engaging in social decentering. The appendices include copies of the measure of social decentering and the measure of relationship-specific social decentering. The book is of interest for graduates in communication studies, psychology, and sociology, and valuable for communication and social psychology scholars interested in empathy or perspective taking.

About Whoever Jan 28 2020 About Whoever is insightful, easy-to-read and compelling analysis that puts human sexuality on the social analyst's couch. The book explores original and contemporary perspectives, affirms a comprehensive range of sexual identities and helps us understand ourselves and each other in today's world. Experiences of real people, influences of history, culture, crucial developments in American Equal Rights, "Don't Ask Don't Tell," domestic partnerships and other subjects provide fascinating backdrop to the discussion. Gay, straight, right-wing, left, or whoever we are, About Whoever indisputably tells about us.

Social Dominance Nov 25 2019 This volume focuses on two questions: why do people from one social group oppress and discriminate against people from other groups? and why is this oppression so mind numbingly difficult to eliminate? The answers to these questions are framed using the conceptual framework of social dominance theory. Social dominance theory argues that the major forms of intergroup conflict, such as racism, classism and patriarchy, are all basically derived from the basic human predisposition to form and maintain hierarchical and group-based systems of social organization. In essence, social dominance theory presumes that, beneath major and sometimes profound difference between different human societies, there is also a basic grammar of social power shared by all societies in common. We use social dominance theory in an attempt to identify the

elements of this grammar and to understand how these elements interact and reinforce each other to produce and maintain group-based social hierarchy.

Memory for Imagined Relationships and the Connection Between Fantasy Orientation and Social Ability Jan 08 2021 Creating imaginary companions (ICs) is a common occurrence in early childhood. However, how often ICs are remembered beyond early childhood and what factors might influence that memory is an open question. Similarly, although having an IC in early childhood is associated with greater social ability; whether fantasy orientation is related to social ability later in life is unknown. I interviewed adolescents who participated in a study about ICs when they were preschoolers about their memories of those ICs. I predicted that the age at which a child created an IC, the duration of that IC, family support of the companion and the presence of a notable event related to the IC would influence whether adolescents remembered having an IC. I hypothesized that family support of an IC could be a proxy for family support of fantasy and that support of fantasy would be positively associated with fantasy orientation in adolescence. I also hypothesized that current fantasy orientation would be positively associated with Theory of Mind ability. About half of the adolescents interviewed remembered their childhood IC. Duration was positively associated with memory for ICs, while family support of an IC was marginally

associated with memory. Neither family support nor having a notable event related to an IC was associated with adolescent fantasy orientation. Fantasy orientation and Theory of Mind ability were not correlated. The findings of this study suggest that many people do not remember their ICs from early childhood, but that longer duration and familial rehearsal may support recollection. In addition, the connection between fantasy and imaginative play and social ability seen in early childhood does not appear to persist into adolescence.

Creating Social Orientation Through Language May 12 2021 This monograph develops a new socio-cognitive theory of sense-making for analyzing the creative management of situated social meaning. Drawing on cognitive-linguistic and social-interactional heuristics in an innovative way, the book both theorizes and demonstrates how embodied cognizers create complex situated conceptualizations of self and other, which guide and support their interactions. It shows how these sense-making processes are managed through the coordinated social interaction of two (or more) communicative partners. To illustrate the theory, the book draws on two distinct data sets: front-desk tourist-information transactions and online-workgroup discussions. It scrutinizes how the communicative partners use verbal humour as a powerful strategy to creatively establish a situated social image for themselves. This book addresses specialists and advanced students in the areas of cognitive linguistics as well as interactional approaches to language. Moreover, it will be of great value to readers interested in verbal humour, business communication, and computer-

mediated communication.

Theories of Social Work. The Concept of Lifeworld Orientation Sep 23 2019 Seminar paper from the year 2009 in the subject Social Work, grade: 1,0, Johannes Gutenberg University Mainz, language: English, abstract: Scientists and academics are repeatedly confronted with questions about the theories on which their work is based. Especially in relation to the relationship between theory and practice, the question arises as to what extent and whether theories are necessary at all in social work. To put it bluntly, the *raison d'être* of social work as a science and course of study at universities is also called into question

here. If theories are not needed at all, why should social work be represented as a science at universities? In this paper, I would therefore first like to deal with the concept of theory. Even though a general definition of the concept of theory in terms of scientific theory is difficult due to its complexity, an attempt will be made here to arrive at an initial understanding of the concept of theory. Based on this, we will then ask for criteria or definitions of theories of social work. The second part of this paper will then deal with a theory or a concept in the context of social work by way of example. The first question is about the basic assumptions of the concept of lifeworld orientation, its lines of tradition and its development. This is followed by a presentation of the dimensions represented within the concept of lifeworld orientation as well as the structural and action maxims on which lifeworld-oriented social work is based. Finally, before a brief concluding remark, the previously explained concept of lifeworld-oriented social work will be concretised using the example of social-pedagogical family assistance.
